Safety vs Crime

Which of the following statements comes closer to your own point of view, even if neither is exactly right?

		Age					Gender		Education		Race			
	Total	18-29	30-44	45-54	55-64	65+	Man	Woman	Less than college	College	White	Black	Hispanic	Other
We should fully fund things to create safe communities and improve people's quality of life, like good schools, a living wage, affordable housing, and do more to prevent crime by increasing treatment for mental health and drug addiction and getting illegal guns off the street	61%	79%	74%	60%	50%	50%	60%	62%	59%	65%	56%	81%	79%	64%
We should do more to get tough on crime, like having tougher sentences for people convicted of violent crimes, maintaining strong bail laws to keep dangerous people in jail, and providing police more support and resources	39%	21%	26%	40%	50%	50%	40%	38%	41%	35%	44%	19%	21%	36%
Weighted N	**1,000**	**157**	**230**	**162**	**188**	**263**	**471**	**519**	**600**	**400**	**729**	**118**	**78**	**75**

Accountability vs Crime

Which of the following statements comes closer to your own point of view, even if neither is exactly right?

		Age					Gender		Education		Race			
	Total	18-29	30-44	45-54	55-64	65+	Man	Woman	Less than college	College	White	Black	Hispanic	Other
To make communities safe, people who break the law must be held accountable. This means seeing the harm they've done, accepting the consequences, learning from mistakes, and changing their behavior. Harsh punishment and long sentences alone lead to more violence. We need to provide people with programs that work to turn their lives around and prevent future crime	54%	62%	67%	54%	47%	42%	52%	54%	50%	60%	51%	66%	59%	57%

RV Omni 2026 October B2 - Vera Institute

Online sample of 1,000 voters fielded from October 22 to October 26, 2026.
Margin of error: +/-3.5%.

YouGov Blue

This survey is based on 1,000 interviews conducted by YouGov on the internet of registered voters. The sample was weighted according to gender, age, race/ethnicity, education, and U.S. Census region based on voter registration lists, the U.S. Census American Community Survey, and the U.S. Census Current Population Survey, as well as 2020 Presidential vote and approximate 2024 Presidential vote based on available results, and party identification estimates based on Pew Research Center's National Public Opinion Reference Survey. Respondents were selected from YouGov to be representative of registered voters. The weights range from 0.15 to 6.03 with a mean of 1 and a standard deviation of 0.55.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetted sample is approximately 3.5%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + \text{CV}^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
